

# Johnson & Johnson's Scientific Response to Help Combat COVID-19

“ We have been actively engaged in fighting pandemics for over a century. We have done it before, and we will do it again. ”

**Paul Stoffels, M.D.**  
Vice Chairman of the Executive Committee and Chief Scientific Officer, Johnson & Johnson

## We are committed to:

**Accelerating the clinical development of our Janssen COVID-19 vaccine candidate** and expanding our manufacturing and distribution capabilities

Working with partners to **screen a library of compounds**, and conducting clinical trials to explore potential therapeutics

Collaborating with regulators, healthcare organizations, institutions and communities worldwide to **help ensure our research platforms, existing science and outbreak expertise can be maximized** to stem this public health threat

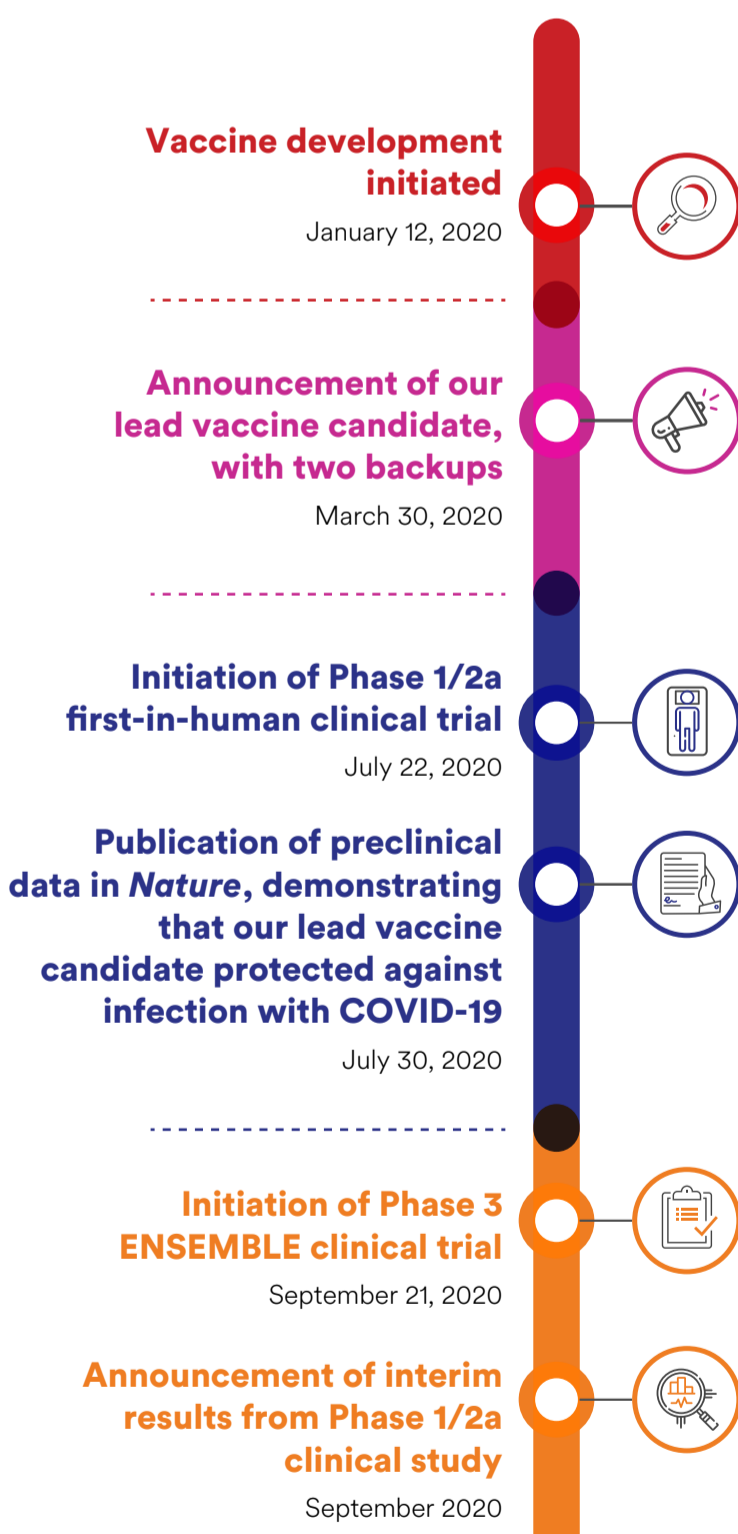

**Taking an evidence- and science-based, ethics- and values-driven approach** to medical safety, putting patient and consumer wellbeing first and foremost in our decision making and actions

## Progress Toward a Vaccine for COVID-19

Since the early days of the outbreak, Johnson & Johnson has been working with industry partners, governments and health authorities to help end the fast-moving COVID-19 pandemic through the development of a possible preventive vaccine candidate against COVID-19.

Our Janssen COVID-19 vaccine program is leveraging Janssen's AdVac<sup>®</sup> [technology](#), which provides the ability to rapidly develop new vaccine candidates.

## Commitment to Collaboration

The search for a potential COVID-19 vaccine and COVID-19 treatments is being progressed by partnerships and collaborations, including those between the Janssen Pharmaceutical Companies of Johnson & Johnson and the Biomedical Advanced Research and Development Authority ([BARDA](#)), part of the U.S. Department of Health & Human Services, and the Beth Israel Deaconess Medical Center ([BIDMC](#)). We are committed to collaborating with multiple stakeholders to ensure any future effective vaccines and/or therapies against COVID-19 will be accessible wherever needed.
